

Master of Science in Audit Analytics

In the next few years, more than 2 million new data analytics jobs will be created, boosting related employment opportunities by a staggering 45 percent. The Bentley Master of Science in Audit Analytics (MSAA) provides the skills and experience you need to get ahead of the competition in this fast-growing, competitive big data job market.

The high demand for accounting graduates with strong data and analytics skills is the reason why Bentley created a degree for students interested in audit firm practices such as risk management and process assurance. You'll gain skills in accounting practices and advanced expertise in accounting and auditing, using industry tools to explore data mining and predictive analytics.

Program Features

- Courses from five departments (Accountancy, Computer Information Systems, Finance, Information Process Mathematics, Management) sharing a common core with other MS in Analytics programs.
- Choose from three specialized tracks: accounting analytics, database analytics and forensic analytics.
- Straightforward, 10-course degree that can be completed in 12 months.
- AACSB accredited, and the first graduate program of its kind.
- STEM designation, increasing employability of international students due to three years of OPT (optional practical training).

Hands-On Learning

Success in today's business world requires a practical, hands-on approach to information, whether you are analyzing it, integrating it or sharing it. Our seven high-tech learning labs ensure that you'll have access to the leading edge of technology, giving you every opportunity to cut your teeth on the equipment and software being used in the business world today. MSAA candidates can take advantage of our Howard A. Winer Accounting Center for Electronic Learning and Business Management, and learn how to manipulate working solutions from real data trends they uncovered.

Career Outcomes

An MSAA prepares you for such careers as:

- Professional accounting
- Internal auditing
- Audit analytics

“MSAA graduates provide immediate value.”

Jane Fedorowicz

PhD, Chester B. Slade Professor of Accounting and Information Systems

Curriculum

Foundation (6 courses)

All applicants will be evaluated for foundation course waivers.
