

Use Less and Recycle the Rest

FY2012
Total Recycling and Solid Waste (Trash, in tons)

=

Total Recycling

=

Total Solid Waste

FACT: Bentley recycled a total of 225 tons of material last year — equal to the weight of 113 cars. That’s an eight-ton increase over the previous year. However, we still trashed nearly six times as much as we recycled last year — 1,223 tons of material — equal to the weight of 611 cars.

TIPS: Carry a reusable coffee mug and water bottle with you everywhere you go on campus. As a reward, you will save 25 cents on coffee, tea and cocoa at Einstein’s and Starbucks. Fill your water bottle for free at any water fountain on campus or at the bottle filling stations in LaCava and Jennison.
