# SUSTAINABILITY & CONSULTING

## SUSTAINABLE CAREERS

**Sustainability Consultant** Work with companies and communities to develop sustainable processes that reduce strain on the environment and local residents. Address organizational sustainability issues, such as waste management, building practices, and procurement plans.

**Energy Consultant** Design, develop, or evaluate energy-related projects or programs to reduce energy costs or improve energy efficiency. Advocate and implement renewable energy goals.

**Sustainability Compliance Consultant** Ensuring all information about sustainable practices (including waste, energy, and procurement) are properly reported and shared to the right parties. This can also be beneficial information to provide to stakeholders to provide transparency about company sustainability.

**Corporate Sustainability Strategist** Develop corporate strategies to address sustainability issues and share strategies with management, shareholders, customers, and employees.
